

BRAND GUIDELINES • VERSION 1.0

AL DIRAYAH ELECTROMECHANICAL CONTRACTING

الدراية للمقاولات الكهروميكانيكية ذ.م.م

ABU DHABI • UNITED ARAB EMIRATES

ISSUED AUGUST 2026

AN ELECTROMECHANICAL CONTRACTOR FOR THE WHOLE LIFE OF A BUILDING

Al Dirayah supplies, installs and maintains the systems that make a building work — the lifts and escalators that move people through it, the power and electromechanical plant that runs it, and the low-current networks that connect and protect it.

Scope of work

VERTICAL TRANSPORT

Lifts, escalators and moving walkways — installation, repair, modernisation and annual maintenance. Approved subcontractor to TKE, OTIS and KONE.

POWER & ELECTROMECHANICAL

Electromechanical equipment installation and maintenance, power distribution networks and stations, and power transmission line contracting.

LOW CURRENT / ELV

CCTV and surveillance, access control, structured cabling and network infrastructure. Subject to ADMCC registration.

SUPPLY & TRADING

Import and wholesale of lifts, escalators and spare parts, supporting both our own installations and third-party projects.

Licensed activities

CODE	ACTIVITY
4329101	Elevators and Escalators Installation and Repair — primary
4322008	Electromechanical Equipment Installation and Maintenance
4220101	Networks and Power Transmission Lines Contracting
4220102	Power Distribution Networks and Stations Contracting
4100015	Constructional and Engineering Contracting Related to Technology Projects — Final Handover
4659932	Wholesale of Elevators and Escalators and Spare Parts Trading
4610008	Importing
4330003	Tinting and Painting Works

ELV activities — surveillance systems, access control and structured cabling — are to be added, and CCTV work additionally requires ADMCC registration with certified technicians. Update this table when the licence is amended.

AL DIRAYAH

دِرَايَة — *dirāyah* — means thorough know-how: the practical mastery that comes from understanding a thing completely. It is not general knowledge. It is the knowledge that lets someone do the work correctly.

That is precisely what a technical contractor sells. Clients do not buy components — they buy the competence to specify, install, commission and maintain them safely. The name states the promise in the language of the market we work in.

ARABIC

الدراية

PRONUNCIATION

ad-di-RAA-yah

The *d* is a sun letter, so the *l* of “Al” assimilates in Arabic speech. English speakers saying “al di-RAA-yah” are not wrong. Aldar follows the same pattern.

THE ONE RULE THAT MATTERS MOST

The name is written AL DIRAYAH. Always. Everywhere. By everyone.

Not *Diraya*. Not *Al Diraya*. Not *Dirayah* on its own. Not *AlDirayah* as one word. Drift usually begins in an email signature or a WhatsApp Business profile and ends up on an invoice, a vendor registration and a site board — after which it is expensive to correct. Both owners are responsible for enforcing this.

Approved written forms

CONTEXT	FORM
Legal / contractual	Al Dirayah Electromechanical Contracting LLC
Legal, Arabic	الدراية للمقاولات الكهروميكانيكية ذ.م.م
Running text, first mention	Al Dirayah Electromechanical Contracting LLC
Running text, thereafter	Al Dirayah
Logo / signage / uniform	AL DIRAYAH
Email & web	aldirayah.ae

Never abbreviate to initials. “ADEC”, “ADC” and similar are not approved and collide with well-known Abu Dhabi entities.

WHAT WE DO, AND WHAT WE DO IT TO

The business runs on two axes. Four system families, and three things we do to each of them. Every service, capability statement and proposal should be locatable on this grid.

The four systems

MOVE

Lifts, escalators,
moving walkways

POWER

Electromechanical
plant, distribution
networks,
substations,
transmission

CONNECT

Structured cabling,
network
infrastructure

PROTECT

CCTV, surveillance,
access control

The three engagements

STAGE	WHAT IT MEANS	COMMERCIAL ROLE
Supply	Import and wholesale of equipment and spare parts	Margin on goods
Install	Installation, repair, modernisation, commissioning, handover	Project revenue; OEM subcontracting
Maintain	Annual maintenance contracts and callout response	Recurring revenue — the compounding engine

Positioning statement

Al Dirayah supplies, installs and maintains the systems that move, power, connect and protect Abu Dhabi's buildings — with the certified know-how to be trusted with all four.

Lines

PRIMARY LINE

BUILT ON KNOW-HOW
نبني على الدراية

SERVICE / AMC LINE

INSTALLED.
MAINTAINED.
ALWAYS ON.

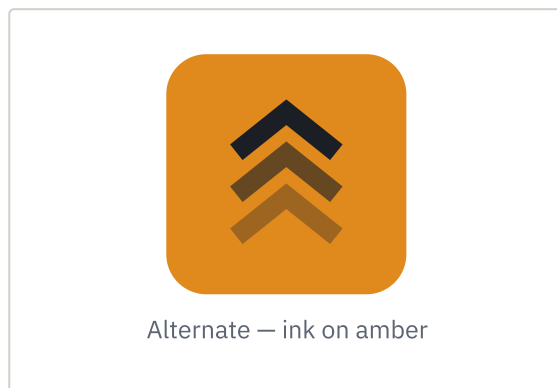

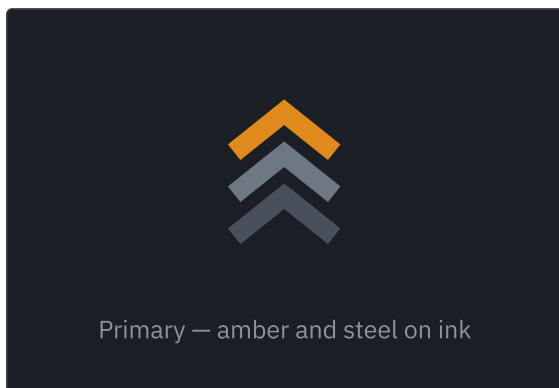

The primary line is a direct statement of what the name means, and works in both languages. Use one line per artefact — never both together.

Tone of voice

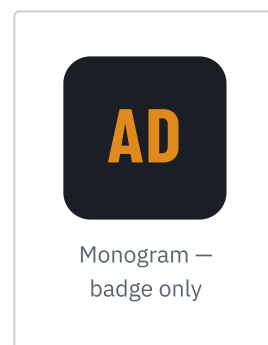

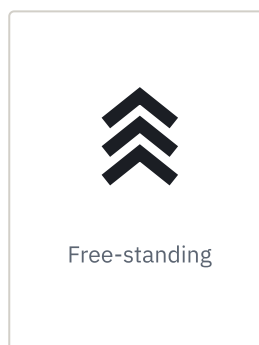

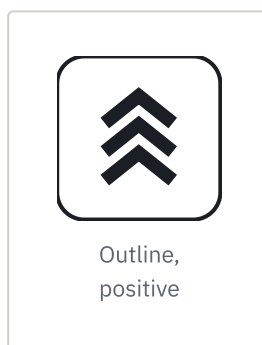

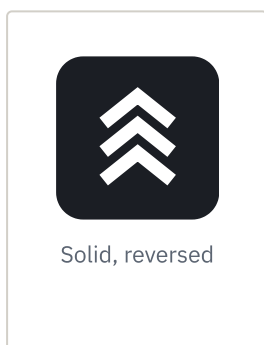

- ✓ **Precise.** Give the load rating, the response time, the certification number. Specificity is the proof.
- ✓ **Plain.** Short sentences. Ordinary words. Our readers are engineers, procurement officers and facility managers reading in a second language.
- ✓ **Accountable.** Say who does what, by when. Name the standard being met.
- ✗ **No superlatives.** Not “leading”, “world-class”, “state-of-the-art”. Anyone can type those; nobody believes them.
- ✗ **No borrowed prestige.** Never imply we are an OEM, or that an OEM endorses us beyond what our agreements permit.

ASCENT

Three chevrons rising, each lighter than the one above it. Read as floor levels in a building section, as signal strength, and as upward motion — one form covering vertical transport, low current and the direction of the business.

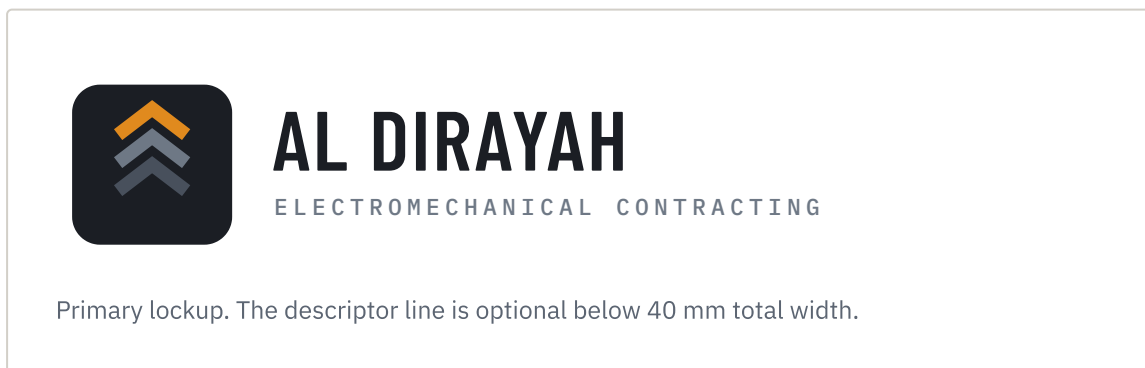

Single-colour and cut versions

The monogram is for favicons, lapel pins, PPE stickers and other spaces under 15 mm. It never replaces the mark in signage, documents or livery.

Horizontal lockup

Clear space and minimum size

X equals the height of one chevron.
Nothing — type, image, edge or fold — enters this zone.

MINIMUM REPRODUCTION SIZE

Mark, print	10 mm
Mark, embroidered	18 mm
Mark, screen	28 px
Horizontal lockup, print	40 mm wide
Lockup with descriptor	55 mm wide
Monogram, minimum	8 mm

Misuse

NEVER

Recolour outside the palette. Blue in particular reads as an OEM.

NEVER

Rotate or tilt. The mark points up; that is the entire idea.

NEVER

Stretch or compress. Scale proportionally only.

NEVER

Add effects — shadows, bevels, gradients, outer glows.

NEVER

Reset the wordmark in another typeface, or drop "AI".

NEVER

Place free-standing chevrons on a busy image. Use the contained mark.

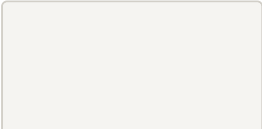

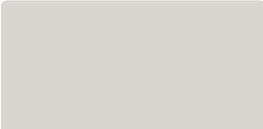

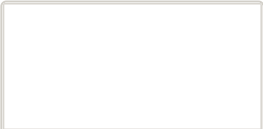

MACHINE ROOM, BRUSHED STEEL, INDICATOR AMBER

The palette comes from the places we work: the graphite of a machine room, the brushed steel of a lift car, the amber of a floor indicator and of high-visibility PPE. It deliberately avoids contractor blue — the colour our OEM principals already own on site.

Core palette

		
Anthracite Primary. Ink, grounds, livery base. HEX #1B1E24 RGB 27 30 36 CMYK 72 63 51 48 PMS 433 C	Signal Amber Accent. One per artefact, never as a field. HEX #E08A1E RGB 224 138 30 CMYK 6 52 96 0 PMS 1385 C	Brushed Steel Secondary. Rules, captions, subordinate marks. HEX #6E7885 RGB 110 120 133 CMYK 60 47 37 8 PMS Cool Gray 9 C

Supporting neutrals

			
Concrete Page ground HEX #F5F4F1	Dust Rules, borders HEX #D9D6D0	Shadow Steel Third chevron HEX #48505C	White Surfaces, reversed type HEX #FFFFFF

Functional colours

Used only in reports, dashboards and status labelling. These are never brand colours and never appear in the logo, livery or marketing.

Pass HEX #1F7A4D	Attention HEX #C9971A	Fail HEX #B23120
--	---	--

Proportion

60 · Concrete / White	28 · Anthracite	8 · Steel	4
-----------------------	-----------------	-----------	---

Amber is an accent at roughly 4% of any surface. It marks the one thing that matters on a page — a heading rule, a chevron, a call to action. Large amber fields cheapen it and read as hazard signage rather than brand.

SITE AND PPE EXCEPTION

Statutory high-visibility clothing follows EN ISO 20471 and site rules, not this palette. Hi-vis vests, harnesses and helmets stay in their mandated colours. Brand amber is close to hi-vis amber by design, so the two sit together comfortably — but safety specification always wins.

THREE ROLES, ONE ENGINEERING VOICE

All four faces are open-source and free for commercial use, so every subcontractor, printer and signage supplier can install them without a licence negotiation. That matters more than novelty when the same mark has to be produced by ten different vendors.

DISPLAY — BARLOW CONDENSED, SEMIBOLD 600

AL DIRAYAH

LIFTS · ESCALATORS · POWER · LOW CURRENT

Barlow descends from Californian highway signage — built to be read at distance, narrow enough to fit a van door or a site board. Used for the wordmark, headlines and signage. Uppercase, tracked +10 to +30 units.

TEXT — IBM PLEX SANS, REGULAR 400 / SEMIBOLD 600

Supply, install and maintain

Every proposal, method statement, maintenance report and pre-qualification document is set in IBM Plex Sans. It was drawn for engineering documentation, holds up at small sizes, and its numerals are unambiguous — which matters when a document carries load ratings and part numbers.

Body 10–11 pt, line height 1.5. Never below 9 pt in print.

ARABIC — IBM PLEX SANS ARABIC, REGULAR 400 / SEMIBOLD 600

الدراية للمقاومات الكهروميكانيكية

نورّد ونركّب ونصون الأنظمة التي تدير المبني — من المصاعد والسلالم المتحركة إلى شبكات الطاقة وأنظمة التيار المنخفض.

The Arabic companion to Plex, drawn on the same skeleton — so bilingual documents hold together instead of looking assembled from two unrelated fonts. This is the only approved Arabic face.

DATA – IBM PLEX MONO, REGULAR 400 / MEDIUM 500

4329101 · 1600 kg · 1.75 m/s · AMC-2026-0114

Activity codes, part numbers, contract references, specifications, tabular data and small technical labels. Also the descriptor line under the wordmark. Tracked +100 to +250 for uppercase labels.

Hierarchy

ROLE	FACE	SIZE / WEIGHT	NOTES
Display heading	Barlow Condensed	28–48 pt / 600	Uppercase, tracked +20
Section heading	IBM Plex Sans	13–16 pt / 600	Sentence case
Body	IBM Plex Sans	10–11 pt / 400	Line height 1.5
Caption	IBM Plex Sans	8.5–9 pt / 400	Brushed Steel
Label / eyebrow	IBM Plex Mono	7–8 pt / 500	Uppercase, tracked +160
Data / codes	IBM Plex Mono	9–10 pt / 400	Tabular figures on
Arabic body	IBM Plex Sans Arabic	11–12 pt / 400	Set 1 pt larger than Latin

Arabic is set one point larger than its Latin equivalent. Arabic letterforms carry more detail at the same nominal size, and this keeps the two scripts optically matched on bilingual documents.

EQUAL WEIGHT, CORRECT ORDER

Everything client-facing in Abu Dhabi is bilingual. Arabic is not a translation bolted on at the end — on government, municipality and developer submissions it is the primary language, and getting the hierarchy wrong is noticed.

Stacked lockup

AL DIRAYAH

الدرية

English above, Arabic below, separated by a hairline rule in Dust. Both align to the same optical width.

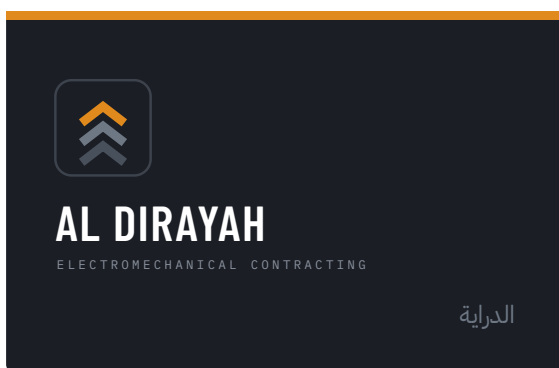

Rules

- ✓ On bilingual documents, Arabic occupies the right column and English the left, matching reading direction.
- ✓ Set Arabic 1 pt larger than the matching Latin text for optical parity.
- ✓ On government, DMT, ADDC and municipality submissions, Arabic leads.
- ✓ Have a native Arabic speaker proof every set piece before it is printed. Shaping and joining errors are invisible to non-readers and glaring to readers.
- ✗ Never transliterate English marketing copy into Arabic script. Write it in Arabic, or leave it in English.
- ✗ Never use a substitute Arabic font because Plex Arabic was not installed. Fix the installation.
- ✗ Never stretch Arabic glyphs (kashida-padding) to force a line to justify.

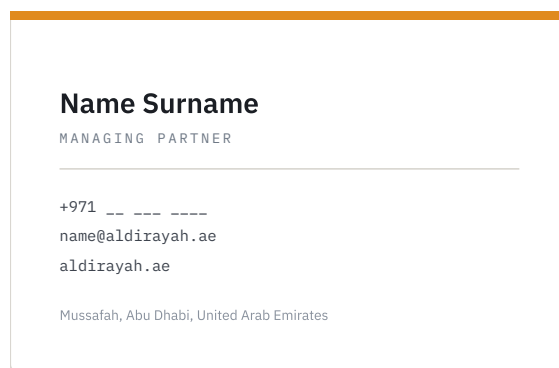

WHERE THE BRAND ACTUALLY LIVES

Almost nobody will see this brand on a website first. They will see it on a technician's coverall in a machine room, on a van in a basement car park, and on the cover of a pre-qualification document. Those three are the priority.

Business card — 85 × 55 mm

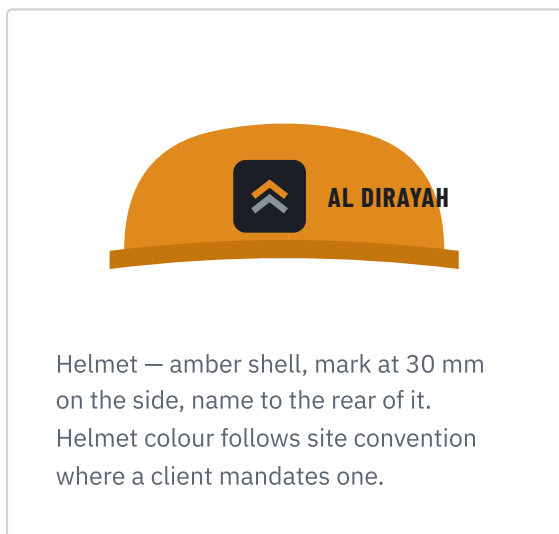

Front — anthracite, amber edge rule

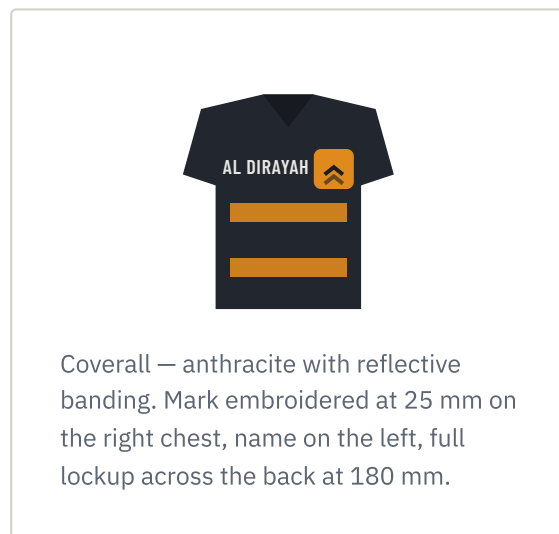

Back — white, contact detail in mono

Workwear and PPE

Helmet — amber shell, mark at 30 mm on the side, name to the rear of it. Helmet colour follows site convention where a client mandates one.

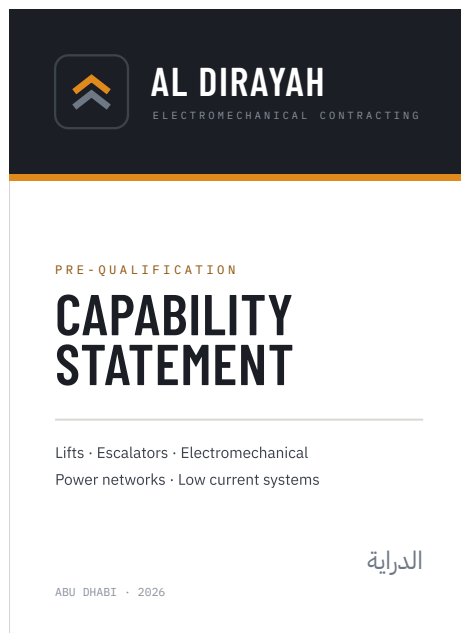

Coverall — anthracite with reflective banding. Mark embroidered at 25 mm on the right chest, name on the left, full lockup across the back at 180 mm.

Vehicle livery

White body, anthracite skirt, amber rule at the sill. The mark and wordmark occupy the forward third; Arabic and the domain sit at the rear. Legible from two lanes away — which is the only test that matters.

Document cover — pre-qualification and proposals

Anthracite band, amber rule, Barlow Condensed title

COVER REQUIREMENTS

- Lockup top-left in the anthracite band, always
- Amber rule separates band from field — 3.5 pt at A4
- Title in Barlow Condensed, uppercase, two lines maximum
- Arabic name bottom-right
- Document reference and date in mono, bottom-left

ID BADGE

Portrait 54 × 86 mm. Anthracite header with monogram, photo, name in Plex Sans SemiBold, trade and certification in mono, ADMCC or OEM certification number where applicable. Reverse carries emergency contact and the licence number.

Site signage

Project boards follow the main contractor's template where one is issued. Where we control the board: anthracite ground, mark and wordmark at the top-left, amber rule

beneath, scope line in mono, and both languages present. Minimum wordmark height on a hoarding is 150 mm.

KEEPING IT CONSISTENT

Identity record

FIELD	VALUE
Legal name, English	Al Dirayah Electromechanical Contracting LLC
Legal name, Arabic	الدراية للمقاولات الكهروميكانيكية ذ.م.م
Trading name	Al Dirayah
Emirate / authority	Abu Dhabi · ADDED
Primary activity	4329101 – Elevators and Escalators Installation and Repair
Primary domain	aldirayah.ae
Defensive domains	aldirayahgroup.com · aldirayah.net
Email format	firstname@aldirayah.ae
Shared mailboxes	info@ · service@ · accounts@ · tenders@

Complete this table with the licence number, establishment card number and registered address once the licence is issued, and reissue the document as version 1.1.

File naming

ALD_[type]_[client-or-project]_[YYYY-MM-DD]_[v###].[ext]

Example: ALD_PQ_EmiratesFM_2026-09-14_v02.pdf — the ALD prefix is for internal file management only and is never used as a public abbreviation of the company name.

Brand rules relating to our OEM principals

READ THE AGREEMENT BEFORE YOU PRINT ANYTHING

Subcontractor agreements with TKE, OTIS and KONE place strict limits on the use of their names, marks and colours. Assume the following unless a specific written permission says otherwise:

- Never place an OEM logo on our website, vehicles, uniforms, stationery or marketing.
- Never describe ourselves as “authorised”, “approved” or “official” without the exact wording permitted in writing.
- Never adopt an OEM’s colours or design language — one reason this identity avoids blue entirely.
- Client-facing claims about OEM relationships go through a named partner before publication.

The trading activity on our licence — wholesale of lifts, escalators and spare parts — may conflict with exclusivity or genuine-parts clauses in those agreements. Check every clause before trading a single component.

Approval

- ✓ Anything carrying the mark and leaving the company is approved by a named partner before it is produced.
- ✓ Master artwork lives in one place, controlled by the partners. Suppliers receive files from that source only.
- ✓ Supply printers and signage vendors with vector files — SVG, EPS or PDF. Never a screenshot or a PNG lifted from the website.
- ✗ Nobody redraws, re-traces or “tidies” the mark. If a supplier says they need to, they need the vector file instead.

Open items

- **ADDED trade name reservation** — clear الدراية and Al Dirayah in both scripts, and confirm whether *Al Diraya* and *Al Dirayah* count as one reservation or two.
- **Primary activity** — set 4329101 as primary. It currently appears to be set to Importing, which would change the licence type and the legal descriptor in this document.
- **ELV activities** — add surveillance, access control and structured cabling; obtain ADMCC registration for CCTV.
- **Manpower supply** — if pursued, it requires a separate MOHRE-licensed entity. The architecture supports Al Dirayah Workforce LLC using the same mark with a divisional descriptor.
- **Domains** — register aldirayah.ae on licence issue; secure aldirayahgroup.com and aldirayah.net now.
- **Trademark** — consider filing the mark and wordmark with the UAE Ministry of Economy in the relevant classes once trading begins.

الدراية للمقاولات الكهروميكانيكية ذ.م.م · Al Dirayah Electromechanical Contracting LLC

Brand guidelines version 1.0 · Issued August 2026 · Abu Dhabi, United Arab Emirates

This document is the controlled reference for the Al Dirayah identity. Where a supplier, printer or designer needs direction not covered here, they ask a partner rather than deciding for themselves. Reissue with an incremented version number whenever the licence details, activity list or identity data change.
